Professional Summary

Bachelor of Technology in Information Technology from VR Siddhartha Engineering College with experience in full-stack development, AI/ML engineering, and intelligent system design. Worked on AI-driven research projects at IIT Tirupati and developed scalable applications using FastAPI, Streamlit, React, and Python. Published research work in Springer Nature (SPIN 2025) and built deep learning solutions using PyTorch, TensorFlow, and computer vision techniques. Familiar with modern AI frameworks and concepts including LangChain and RAG pipelines. Certified AWS Cloud Practitioner with hands-on experience in deploying end-to-end AI applications.

Technical Skills

Programming Languages: Python, Java, JavaScript, C++

Frontend Development: ReactJS, HTML, CSS, Tailwind CSS

Backend Development: Node.js, FastAPI, REST APIs

Machine Learning & AI: TensorFlow, PyTorch, Keras, scikit-learn, OpenCV

LLMs & NLP: Hugging Face, RAG Pipelines, AI Agents, LangChain, Transformers

Databases: MongoDB, MySQL, PostgreSQL, SQLite

DevOps & Cloud: Docker, AWS, CI/CD Pipelines, Vercel

Tools & Platforms: Git, GitHub, Linux, Jupyter Notebook

Experience

Research and Development Intern

July 2025 – November 2025

IIT Tirupati – PNT Research Labs

Tirupati, India

- Developed deep learning pipelines for land cover classification using Sentinel-2 multispectral imagery, achieving 90%+ accuracy across 10 land cover classes with CNN and Transformer-based models
- Applied spectral band selection and data augmentation for improved model generalization, while collaborating on AI-based PNT enhancement research and technical documentation

Space Technology & Remote Sensing Intern

June 2025 – July 2025

India Space Lab

Vijayawada, India

- Designed and simulated an autonomous disaster-management drone system with AI-based obstacle avoidance, achieving 92% accuracy in simulated environments
- Implemented A* and RRT* path planning with sensor fusion for real-time navigation, using SolidWorks, ROS, Gazebo, and Mission Planner for design and flight control integration

Projects

TalentScout – AI-Powered Technical Interview Platform

Dec 2025 – Feb 2026

- Built an AI-driven interview platform using FastAPI and Streamlit with Groq API integration for adaptive question generation based on candidate tech stack and experience
- Developed an AI-based answer evaluation and anti-cheating system with multi-dimensional scoring, fullscreen enforcement, DevTools detection, copy-paste blocking, and live camera monitoring, deployed on Render

Multispectral Image Analysis for Land Cover Classification Using Deep Learning

April 2025 – July 2025

- Built CNN and U-Net based deep learning models for land cover classification using 13-band Sentinel-2 multispectral imagery, achieving 92%+ validation accuracy
- Applied NDVI, NDWI, and NDBI-based preprocessing for improved class separation and deployed the model on Hugging Face Spaces for real-time visualization and inference

Change Detection Using Multispectral Remote Sensing for Urban Monitoring

Dec 2024 – Feb 2025

- Developed a bi-temporal change detection tool using Landsat-8 imagery to analyze land cover transitions across urban and peri-urban regions over multi-year periods
- Applied spectral indices including NDVI, NDBI, and NDWI for enhanced change detection, improving accuracy over traditional thresholding methods

Education

Velagapudi Ramakrishna Siddhartha Engineering College <i>Bachelor of Technology in Information Technology GPA: 8.7 / 10</i>	Vijayawada, AP <i>2022 – 2026</i>
Sri Chaitanya Educational Institution <i>Intermediate MPC GPA: 10 / 10</i>	Vijayawada, AP <i>2019 – 2021</i>
Bright High School <i>Schooling GPA: 8.8 / 10</i>	Hyderabad, TG <i>2019</i>

Publications

[1] Chandu, Bhargav Adithya, *et al.* “Change Detection Using Multispectral Remote Sensing for Urban Monitoring.” *International Conference on Signal Processing and Integrated Networks (SPIN)*. Singapore: Springer Nature Singapore, 2025.

Certifications

- AWS Certified Cloud Practitioner – Amazon Web Services
- Programming Essentials in Python – Cisco
- Understanding Incubation and Entrepreneurship – NPTEL
- Joy of Computing Using Python – NPTEL

Languages

- English: Advanced
- Hindi: Intermediate
- Telugu: Native
